Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species 4, the embodiment of Figs. 29-45 and Claims 13-43 as being readable on the elected Species 4* in the reply filed on 6/9/05 is acknowledged.

Claim Rejections - 35 USC § 112

1. Claims 13-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. The following claims are vague, indefinite, awkwardly and confusingly worded:

i. **Applicant should review the following rejections and upon correcting these. Make sure the dependent claims are clear in there connections in view of the changes.**

ii. Claim 1 recites both a power tool and an actuator but the specification describes these two elements as being the same thing. It is not clear if they are separate of elements or it this is a case of double inclusion.

iii. Claim 14 states that an extension sleeve and an extension projection are connected to the mounting sleeve and a power tool. The sleeve and extension are described as being connected to each other and

then the housing. The claim must recite the same mode of connection as described in the specification. Also the claim is not clear in how the connections are made for example is the housing or tool connected to the extension sleeve and then extension projection connect to the extension sleeve.

iv. Claim 25 recites both a power tool and a feed device but the specification describes these two elements as being the same thing. It is not clear if they are separate of elements or if this is a case of double inclusion.

v. Claim 25 states that an extension sleeve and an extension support is connected to the device housing and a power tool. The sleeve and extension are described as being connected to each other and then the housing. The claim must recite the same mode of connection as described in the specification.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Fujiyama et al (5899126).

Fujiyama et al discloses a fastener feed having a power tool (screw tightener) a mounting sleeve (102), a clamping block (106), and an actuator (123).

(Applicant should note that there appear to be limitation in the preamble of the claim but they are not being clear recited as part of the invention. If the applicant does not wish this to be the case please positive recite the limitations with the proper connection in regard to the structure so they parts being claimed are clear.)

Allowable Subject Matter

4. Claims 25-43 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. **(Note the preamble of the claims are unclear if they are being recited as limitations of claim or if it is function. Applicant should either change the claims or make statements to be considered.)**

5. Claims 14-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. **(Note the preamble of the claims are unclear if they are being recited as limitations of claim or if it is function. Applicant should either change the claims or make statements to be considered.)**

Conclusion

Art Unit: 3723

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arata et al disclose a device.
